Terrorism may be national or international in scope, but terrorist incidents occur locally and are preceded by a number of pre-incident activities. Individuals in the community are key to identifying these pre-incident activities. By learning what to look for, **you** can aid law enforcement officials in protecting the homeland.

Your knowledge can be an invaluable resource to the law enforcement community. In your business arena, **you** are best informed about what constitutes suspicious activity.

By being aware of what to look for and knowing how to report suspicious behavior, **you** can make a positive contribution in the fight against terrorism. The **partnership between the community and law enforcement** is essential to the success of anti-terrorism efforts.

It is important to remember that just because someone's speech, actions, beliefs, appearance, or way of life is different, it does not mean that he or she is suspicious. Instead, focus on behavior and activities that are unusual or out of place for the situation and that appear to be suspicious.

The activities outlined on this handout are by no means all-inclusive but have been compiled from a review of terrorist events over several years. Some of the activities, taken individually, could be innocent and must be examined by law enforcement professionals in a larger context to determine whether there is a basis to investigate.
